to treat peers tolerantly.

In the joint activities of children of primary school age, there is a constant need to coordinate actions, show a friendly attitude towards peers, and be able to give up personal desires for the sake of achieving a common goal. Communication and joint activities contribute to the practice of younger schoolchildren in correct actions, which are necessary to know the norms of behaviour and be guided by them [2, p. 79].

Therefore, there is a need to create such an environment in extracurricular activities in which children of primary school age can apply their knowledge, inclinations, abilities, skills, etc., to qualitatively master the culture of communication with peers. The specified pedagogical conditions are relatively independent, but simultaneously they are interconnected and complement each other, creating a single complex.

AN ANALYSIS ON THE WAYS OF CHATGPT TO IMPROVE THE ACADEMIC WRITING ABILITY OF COLLEGE ENGLISH TEACHERS

Keywords: *academic writing; ChatGPT; college English teachers; artificial intelligence.*

As the main force of scientific research and teaching students, the academic ability of college teachers is crucial, and their writing ability is especially concerned, not only about their personal professional learning and scientific research ability, but also closely related to the quality of English teaching and the enhancement of the level of talent cultivation. Therefore, research on academic writing of college English teachers can to a certain extent promote the professional development of college English teachers and enhance the influence of college English teachers in the academic world.

At present, international studies on academic writing of college English teachers focus on the significance of academic writing for teachers' personal growth and professional development. For example, academic writing provides teachers with opportunities to express themselves, gain the satisfaction of academic recognition, and improve their credibility and authority (Whitney et al., 2012); academic writing is an important way for teachers to reflect on their own professional practice ability (Rathert & Okan, 2015). In China, relevant studies mainly focus on analyzing and exploring the factors affecting college English teachers' participation in academic writing, such as: the requirements for promotion and scientific research, the difference between teachers' academic training background and accumulation of practical experience (Meng Chunguo, Chen Liping, and Zheng Xinmin, 2018), and insufficient time for scientific

research due to heavy teaching tasks (Ren Wei, 2018); based on a variety of influencing factors, some studies have proposed that enhancing the strategies to enhance the academic writing engagement of college teachers, for example, formulating diversified criteria for teacher evaluation and title promotion (Wen Qiufang, Zhang Hong, 2017), emphasizing the cultivation of research methodology (Zhang Hui, Zhang Songsong, 2018), constructing various types of faculty development community models (Li Zi, Liu Haiyan, 2022), and other various ways. In order to promote the improvement of teachers' academic writing ability, scholars have combined their efforts to propose a variety of ways, however, the development and progress of the times also affects teachers' academic writing in the same way.

With the development of artificial intelligence and other new technologies in recent years, the production of human knowledge has undergone disruptive changes, and the pace of updating and iteration has accelerated. Knowledge has a certain timeliness, its value will be weakened or reduced with the passage of time, for this reason, the emergence of the "half-life of knowledge" argument. According to calculation, the half-life of knowledge before 1950 was 50 years, and the half-life of knowledge in the 21st century was 3.2 years on average, and only 1.8 years for IT senior engineers (People's Daily, 2018). A large-scale language model called ChatGPT (Chat Generative Pre-trained Transformer) released by the American artificial intelligence company OpenAI in November 2022 has led to an unprecedented development of generative AI technology, which marks the beginning of a new era of human-machine co-existence. Because the text generated by ChatGPT is able to achieve the existence of a near real person in terms of content arrangement, logical structure, and emotional expression, it will undoubtedly have a great impact on the academic research of English teachers in colleges and universities.

For this reason, this study focuses on the academic writing ability of college English teachers in the context of ChatGpt, explores the functions of ChatGpt in the field of academic writing, and analyzes the ways in which ChatGPT can improve the academic writing ability of college English teachers. It is found that ChatGPT, a new artificial intelligence, can help college English teachers with its powerful intelligent text generation and literature search functions. At the same time, college English teachers can improve their academic writing ability through the three ways empowered by ChatGPT: ubiquity of learning styles, visualization of potential information, and high efficiency of repetitive work. This study can provide some insights for college English teachers' use of ChatGPT.

ENHANCING HIGH-QUALITY DEVELOPMENT OF FOREIGN LANGUAGE DISCIPLINE WITHIN THE FRAMEWORK OF NEW LIBERAL ARTS

Keywords: *new humanities; foreign languages; education; discipline development.*

In the context of the advanced stage of higher education's high-quality development, this paper examines the foreign language discipline from six dimensions: enhancing political awareness, emphasizing connotative growth, aligning with national strategies, addressing regional demands, fostering reciprocal communication, and innovating management practices. It aims to identify new roles and directions for the foreign language discipline within the new liberal arts framework, generate novel breakthroughs and growth opportunities for its scientific advancement, and contribute to the discipline's rapid and high-quality progression.

At this advanced stage of higher education's high-quality development, the foreign language discipline is tasked with embracing the new development philosophy. It must maintain a holistic approach, fortify forward-thinking, engage in comprehensive planning, and strategic organization. The focus is on identifying the discipline's new role and pathways within the context of the new liberal arts. It seeks to discover points of integration and growth that align with the university's strategic development objectives. This involves a coordinated effort to foster the integrated advancement of discipline construction, team formation, talent development, scientific research, and internationalization efforts. By reinforcing the commitment of foreign language professionals, the project aims to support national initiatives for strengthening the country and serving local economic growth, seize emerging opportunities, and guide the faculty towards achieving novel breakthroughs and development.
